VIDEO SURVEILLANCE GUIDE 2018

# VIDEO SURVEILLANCE SYSTEMS

The reliability, integrity and dependability of our video systems ensure that you can meet all of your existing and future security challenges with complete confidence. Our solutions range from IP and analogue cameras and domes, and digital and network video recorders, through to intelligent video analytics and sophisticated video management systems.

# IP Solutions

IP is the technology of the future with tremendous potential for growth and cost savings. Honeywell offers a complete IP solution – from our flagship video management platform and robust portfolio of recording solutions, to our IP camera family, which includes a full range of high definition cameras. And our Open Technology Alliance forges strategic relationships with thirdparty vendors to give you ultimate flexibility when designing IP security systems – so you can capitalize on our open IP architecture and use the third-party equipment you already have in place to hold down costs and transition to IP with confidence and ease.

## So why IP?

---

### **Make quick and informed decisions**

Superior image quality and full-frame-rate video, lets users quickly identify threats or issues thanks to clear pictures both up close or from afar.

### **Expand Business Applications**

Video is not just for catching theft or other evidence, users can also monitor their businesses from anywhere through cloud type services and web based interfaces.

### **Reduce Total Cost of Ownership**

Cost efficiencies and the convenience of leveraging existing network infrastructure helps reduce the overall cost of a system.

### **Improve Accessibility**

No longer are users tied to their servers or stations to view their video. Mobility is the key for real-time access to video information and with cloud and web applications driven through mobile apps, users can access their video information anytime, anywhere.

### **Reduce Installation Time and Costs**

IP solutions install quickly and easily with auto-discovery tools and because you see a wider field of view versus analogue cameras, you can install fewer cameras which can reduce costs.

### **Complete System Scalability**

Add one camera at a time or hundreds; from entry-to-enterprise, IP video solutions are easy to scale no matter the application.

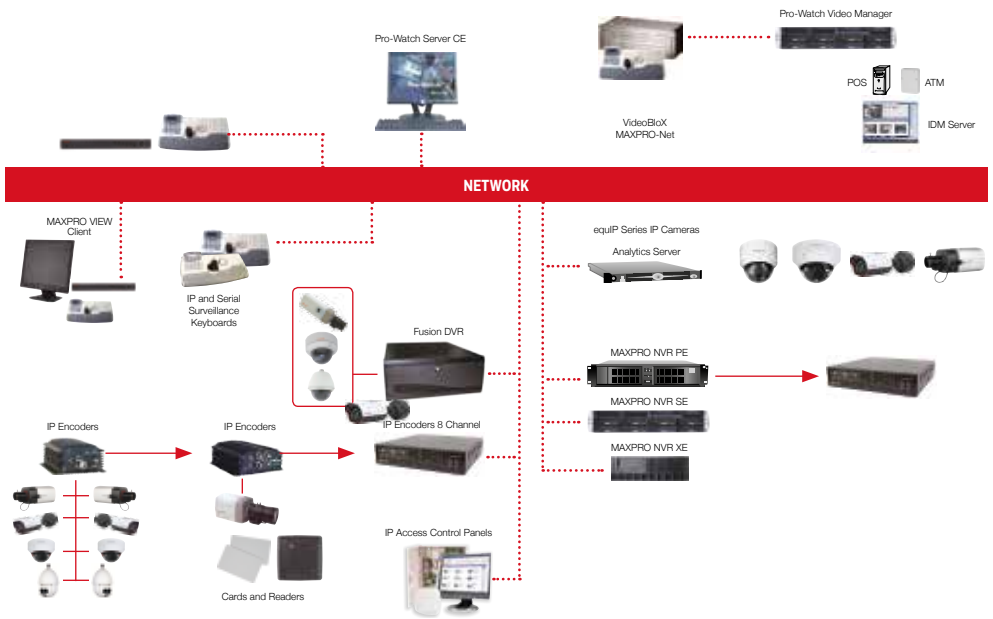

# Video Management System

MAXPRO® VMS controls multiple sources of video subsystems to enhance the user's video surveillance experience with maximum efficiency and minimum effort.

Using an open architecture and IP-based systems, MAXPRO VMS leverages an existing video infrastructure to collect, manage and present video in a clear and concise manner.

## MAXPRO VMS – Single Command and Control Interface

---

### Integrated Video and Security Management System MAXPRO VMS and Pro-Watch®

The integration of MAXPRO VMS and Pro-Watch affords superior access control with alarm monitoring and video capabilities.

### Next Generation Vision MAXPRO VIEW Client Software

MAXPRO VIEW is the feature-rich next generation viewer that works with MAXPRO VMS to help operators intuitively perform video operations, thereby increasing personal productivity and responsiveness.

### World Class, Scalable NVR

MAXPRO VMS is scalable for the future as the needs of your customers grow. Enterprise NVR technology is used in some of the world's largest digital video surveillance systems.

### IP Network Solutions

For a total video management experience, Honeywell's MAXPRO VMS and IP-ready products such as PTZs, Mini-Domes and box cameras integrate with third party DVRs and NVRs – facilitating the migration to IP.

### Unified Command & Control UltraKey IP Controllers

MAXPRO VMS gives users a unified end-to-end solution to interface devices ranging from NVRs and DVRs to PTZ controllers, matrix switchers and joystick controllers.

### Smarter Video, Smarter Decisions with Active Alert® Video Analytics

MAXPRO VMS offers the option of adding our intelligent video analytics suite, Active Alert. The analytics engine uses advanced search tools for manned and unmanned video surveillance systems that removes the strain of surveillance and the burden of data overload from operators.

# Hosted Video Surveillance

**Anytime, Anywhere.** When it comes to security, cloud computing is changing how you can run your business. Honeywell Connected Security System (\*) features the cloud-ready hybrid video appliance that lets users view live and recorded video over the Internet using a PC, Mac, tablet or Smartphone. It is ideal for entry into IP video surveillance systems and offers opportunities for installers through hosted video services.

## **Honeywell Connected Security System\*: Key Benefits**

- Cloud-ready system saves you time – allows you to view and manage live or stored video events from any location via the Internet
- Reduces installation and training costs by not having to install and maintain onsite client software
- Fast and easy deployment – reduces need for IT expertise
- Provides opportunities for RMR through value added hosted video services
- Expandable – additional video storage is available by adding off-the-shelf USB plug-in storage or NAS storage
- Single Sign on to all installed locations
- Powerful and flexible account management of all customer locations
- Full remote monitoring, management and configuration of all devices
- Email alerts of critical site events, alarms and device health
- Back up storage of critical events in the cloud

PART NUMBER	DESCRIPTION
<b>HENxx1x2</b>	"Cloud ready" local storage: 2MP, H.264 4/8/16-channel NVRs (see more information on NVRs section)
<b>HRHT4xxx</b>	"Cloud ready" local storage: 4MP, 4/8/16-channel, HQA/CVBS/IP Hybrid DVRs (see more information on DVRs section)

# Network Video Recorders (NVRs)

Ideal for small to medium-sized businesses, Honeywell's family of network-based boxed NVRs include a Professional Edition (PE), Standard Edition (SE) and Xpress Edition (XE). To simplify installation, the solutions come with pre-installed software and camera licences for quick set-up and system scalability.

As a system grows, multiple NVR units can be combined into a full MAXPRO VMS system to support the deployment of a large-scale system.

## MAXPRO NVR: Key Benefits

### Open and easy to integrate

- Integrates with all Honeywell IP cameras and HVE Recorders
- Support for ONVIF Profile S, PSIA

### Easy to Install and Use

- Pre-installed with all software and pre-licensed for up to 64 Channels (except SW)
- Easy 3-Click wizard for a quick installation
- Learn one, know all – common feature rich user experience across MAXPRO NVR family and MAXPRO VMS / Viewier

### Scalable Integrated Security Solution

- Multiple MAXPRO NVRs deployed for system expansion using a distributed architecture and integrated with the MAXPRO Viewer multi-site software or MAXPRO VMS enterprise video management system
- Integrates with Honeywell WIN-PAK and Pro-Watch Access Control Systems

### Flexible NVR Hardware

- Provides the processor and storage enclosure in one chassis, resulting in both space and cost savings
- Rack mountable with up to 6 removable drives

# Embedded Network Video Recorder (NVRs)

**IP Performance You Want at the Price You Need.** Upgrading to IP has never been so easy and affordable. Our intuitive and cost effective Embedded NVRs have a user-friendly configuration process that takes you to live video after only minutes of setup time. With built in network switches that also supply power to the cameras, installing IP video has never been easier.

Honeywell's Embedded NVRs come in 4, 8 and 16 channel options plus value-priced "off-the-shelf" kits.

## Key Features

---

- **Full PoE channels!** The 16 channel NVR has 16 PoE ports (lowers installation cost & saves time)
- Increased Power-over-Ethernet (Support more PTZs & outdoor cameras with heaters)
- USB 3.0 (back up clips faster)
- Up to 5MP IP camera support (perfect fit for 3MP Performance Series IP Cameras)
- Smart Search (enabling you to locate video footage with motion in a selected area) with the new Performance IP Cameras
- 8ch and 16ch uses AC mains power instead of two separate external (12V & 48V DC) power adapters
- NVRs now also available without hard drives

# IP Cameras

Offering unlimited possibilities for every installation, Honeywell's IP cameras provide outstanding image clarity and definition at minimal bandwidth, enabling better and faster decision making for more effective safeguarding of people and property.

Now with the addition of the EOL range, Honeywell can deliver a more powerful and versatile solution that allows you to customise your installation to your customer's needs.

## IP Cameras

### We're Open to Unlimited Possibilities

Honeywell's newly expanded range of ONVIF-compliant IP cameras give you increased flexibility and the freedom to choose what's right for your installation.

Designed with open IP standards, including ONVIF Profile S & G, our IP network cameras offer superb picture quality and seamless integration to our portfolio of MAXPRO NVRs as well as other manufacturers' network devices to ensure full interoperability.

All cameras in the range support powering over PoE. This allows for faster installation time, remote power management for supply, monitoring, and cost saving verses running individual power to each camera. This provides both energy efficient solutions and infrastructure for centralised uninterrupted power backup for critical operations.

Honeywell's latest IP cameras feature a simplified user interface with ONVIF integration to recording devices with new technology that makes checking the status of your system faster and easier. Designed to meet your customer's security needs, Honeywell's euiP and HDZ cameras along with MAXPRO NVRs integrate to Honeywell and third party products for a complete, fully integrated IP solution.

## Key Highlights

- **Full Range of IP Cameras with Integration:** indoor WDR IR mini domes, outdoor WDR IR rugged cameras, WDR IR rugged bullets, and Ultra Low Light WDR box cameras up to 4 MP all from a single manufacturer to fulfill your customer's needs
- **New, Simplified GUI Design:** save time and money by reducing training hours with the simple and consistent user interface for in all of the cameras
- **Reduce Installation Time:** by eliminating manual zoom process and focus at the cameras with convenient software adjustment and with auto-discovery of Honeywell and ONVIF cameras.

## HDZ IP PTZ Series: Key Highlights

Honeywell's HDZ series of Network PTZ True Day/Night cameras provides extremely crisp video with up to 2 million effective pixels. The series uses the latest digital technology and advanced video processing and includes a wide range of models to meet the diverse needs of large scale surveillance applications.

- Extremely crisp video with model options that include high definition, 22x, 30x & 36x optical zoom
- With continuous video footage via the cameras' onboard SD card storage option, end users can have total confidence even in the unlikely event of a network crash
- Installation time and costs are reduced by eliminating the need for electrician intervention using high power POE++ on outdoor models
- Outdoor models include vandal proof IK10, ensuring continuous monitoring of areas vulnerable to attack and vandalism
- ONVIF compatibility allows "off the shelf" integration to support wider integration to existing or third party systems
- For areas where vibration and adverse weather could interfere with surveillance operations, built-in Electronic Image Stabilizer (EIS) provides an extremely stable platform

# Performance Series IP Cameras

Upgrading to IP has never been so easy and affordable. Honeywell's Performance Series IP cameras are fully featured, competitively priced cameras that pair perfectly with a 4/8/16 32/64-channel Performance Series Embedded NVR.

Choose from a full range of IP cameras that includes up to Ultra HD 4k definition True Day/Night IR mini-dome, bullet and ball cameras to give you greater flexibility to get the solution that's right for your installation. Designed with open IP standards, including ONVIF Profile S, our IP network cameras offer superb picture quality and seamless integration to our Honeywell video NVR solutions.

## Performance Series IP IR Cameras: Key Highlights

- IR LEDs provide up to 60 m of illumination in dimly lit or night-time scenes
- Smart IR technology for even distribution of IR
- Waterproof (IP66) camera housings are perfect for outdoor installations
- Range includes both motorized focus/zoom and fixed lenses for a wide range of field of view options
- Quick wizard and PoE support plug-and-play and make setup fast and easy
- Designed with open IP standards, including ONVIF Profile S
- Simple remote configuration and firmware updating through the Honeywell Viewer web client and the Honeywell Config tool
- Conceal up to 4 areas of a scene from viewing and recording
- Monitor from anywhere using HonView Touch Mobile App
- Onboard video storage options supporting up to 128 GB (some models only – card not included)

# High Quality Analogue (HQA) solutions

Supercharge your analog security system with Honeywell's HQA technology for high definition 4 MP images over your existing coax infrastructure. The Performance Series 4 MP HQA line includes a wide range of high performing IR cameras and DVRs that are easy to install and even easier to use.

# Hybrid Video Solutions: Encoders

ONVIF Profile S compliant Honeywell HVE channel network video encoders are the ideal real-time, high resolution digital encoders for upgrading existing analogue video systems to a networked IP video solution. Using Dual streaming H.264 video compression, the HVE encoder features local storage for continuous and event clip recording and supports MAXPRO NVR and other compliant encoders. By integrating the latest in IP technology with traditional analogue components, Honeywell's solutions offer better control of operational costs whilst maximising existing investments in surveillance equipment.

## HVE Audio/Video Encoders: Key Highlights

- H. 264 ONVIF Profile S supports MAXPRO NVR and other compliant recorders
- Dual streaming with local storage for continuous and event clip recording
- PoE (1 and 4 Ch units)
- Advanced features, such as Motion Detection and privacy zones
- All support alarm inputs and relay outputs
- Audio inputs and bi-directional audio through browser
- Alarm inputs and relay output
- RS485 PTZ control, multiple protocols
- Feature rich web browser, live view, playback of local recorded video, configuration and user management (supports Internet Explorer, Firefox, Chrome, and Safari)

PART NUMBER	DESCRIPTION	STREAM TYPE	COMPRESSION	STORAGE	IPS/CIF

 <b>HVE4X</b>	4-Channel, Audio/Video Encoder, PAL	Video/Video + Audio	Dual streaming: H.264/MPEG4/MPEG2/MJPEG	Local storage microSD: 16 GB up to 32 GB, Class 6 and above microSD	4CIF/2CIF/CIF/QCIF
 <b>HVE8X</b>	8-Channel, Audio/Video Encoder, PAL	Video/Video + Audio	Dual streaming: H.264/MPEG4/MPEG2/MJPEG	Local storage microSD and Hard Drive: Up to 4 TB capacity for each disk	4CIF/2CIF/CIF/QCIF

# Accessories

Honeywell offers world-class lenses for both indoor and outdoor performance. These provide customers with the ability to see high contrast, clear and detailed pictures of subjects in daylight, low light and near infrared light.

They are designed with sophisticated optics for superior light gathering and the ability to work seamlessly with our cameras.
